

New online module launched...

16.07.2018 20:59

For our camping area we have integrated a [new reservation procedure](#) which will make it easier for the guest to book a comfort pitch or a spot on our tent meadow.

The new module is directly connected to our reception program, so that you know immediately whether we still have availabilities during your requested period. If we have something available you can also book directly via the module!

At the end of the reservation process we ask for a deposit of 50% which can be paid via PayPal, immediate transfer or credit card.

If you have problems with the online booking module, please use the [request form](#) and tell us in the text field that you would like to do a reservation. We will then send you a confirmation of your reservation.

For rental accommodations, you will still need to fill in the [conventional reservation form](#). We will check if there is free capacity and will send you a separate reservation confirmation. We are already working on a more comfortable online solution, so you can see directly when which rental accommodation is available!

Should there be any problems during the reservation process, please let us know! We depend on your help to detect and solve mistakes!
